

DT 100 DT 102

DYNAMIC STUDIO HEADPHONES

FEATURES

- Wide frequency response
- High sensitivity
- High sound pressure capability

APPLICATIONS

The DT 100 headphone is widely used in audio recording and monitoring applications in studios worldwide.

The DT 100 offers a high degree of wearing comfort and can be worn for hours without listener fatigue. The soft ear cushions effectively seal out ambient noise yet apply minimal pressure against the ear.

The DT 102 is the identical headphone to the DT 100 with the exception that it is a single-ear headphone. The DT 102 is used in broadcast work, recording, TV studio and theater applications where the monitoring of outside ambient information is necessary.
